

# The Way You Dance

The Go-Go's

The way you dance  
You move in self romance  
And you don't see me watch  
The way you dance  
Your eyes close in a trance  
So you don't see me watching

People in this place just seem to stand around  
Flashing cash they eye each other up and down  
You're all alone out on the floor  
The music spins you 'round  
It's all you came here for

I see the night it's slipping by and every song  
Takes me closer to the time when you'll be gone  
How can I get through  
Don't wanna break the spell  
I just want to dance with you
