

Now's the time for steppin' out of place  
Get up on your feet and give account of your faith  
Pray to God or somethin' or whatever you do  
What I see can make me stop and stare  
But who am I to judge the color of your hair  
Surely you're all feelin' much the same as I do  
We got to keep this world together  
Got to keep it movin' straight  
Love like we mean forever so that people can relate  
If you're rollin' to your left, don't forget I'm on the right  
Trust and forgive each other  
A little love and we just might  
Yeah, yeah  
We gotta do something, we gotta do something  
We gotta do something  
Thinkin' of the troubles of today  
Is it easier to put that gun away?  
Or is it difficult to stop the world and show that you care?  
Everythin' and everyone we know is beautiful  
Surely you will be the guidin' light to save us all  
Maybe we can be the vision of a prophet man's dream  
'Cause we got to keep this world together  
Got to keep it movin' straight  
Love like we mean forever so that people can relate  
If you're rollin' to your left, don't forget I'm on the right  
Trust and forgive each other  
A little love and we just might, just might  
I have somethin', do you have somethin'?  
'Cause I have somethin' for you  
I have somethin', do you have somethin'?  
'Cause I have something for you  
I have somethin', do you have somethin'  
'Cause I have somethin' for you  
I have somethin' for you  
We got to keep this world together  
Got to keep it movin' straight  
Love like we mean forever so that people can relate  
If you're rollin' to your left now, don't forget I'm on the right  
Trust and forgive each other  
A little love and we just might  
'Cause we got to keep this world together  
Got to keep it movin' straight  
Love like we need each other so that people can relate  
If you're rollin' to the left now, don't forget I'm on the right  
Trust and forgive each other  
A little love and we just might, just might, just might, just
