

Wolves

The Good Natured

Wake up to the sound of nothing to insanity
Reaching for the knife to cut a hole in front of me
Raindrops hit the ground they shimmer all in black and white
Open up the door in to the night

And we dance in the fire magical kiss
Wolves will take me home
When I'm lost in desire magical wish
Wolves will take me home
I hear the howling and it's time to let go
The moon is rising and I'll never be alone
Wolves will take me home

I can taste the earth beneath me sink into the ground
I am just a lonely creature slowly falling down
And I crystalise in the sapphire light
Watching all the colours spinning round and round

And we dance in the fire magical kiss
Wolves will take me home
When I'm lost in desire magical wish
Wolves will take me home
I hear the howling and it's time to let go
The moon is rising and I'll never be alone
Wolves will take me home

And we dance in the fire magical kiss
Wolves will take me home
When I'm lost in desire magical wish
Wolves will take me home
I hear the howling and it's time to let go
The moon is rising and I'll never be alone
Wolves will take me home

We're the magic creatures
Living in the wild
We're the dream weavers
Howling from inside
We're the magic creatures
Living in the wild
We're the dream weavers
Howling from inside

And we dance in the fire
