

## Life In The Bloodstream

The Guess Who

You don't believe that this whole universe  
Could be inside your little sister's purse  
You don't believe you're just a living glob  
Like Lucy, Freddy, Ricky, Frank, and Bob.

We're life in the bloodstream, baby  
That's the natural progression  
We're life in the bloodstream  
I hope the little boy don't fall and skin his knee.

Ain't it hard when you discover  
Your energy has to leave you for another  
Don't it make you wanna lay down and cry  
When they tell you it's time you have to die.

We're life in the bloodstream, baby  
That's the natural progression  
We're life in the bloodstream  
I hope the little boy don't fall and skin his knee.
