

10,000 Weight In Gold

The Head and the Heart

I was burned out and lost
A dusty bulb, an abandoned lot
And the nighttime was the worst
It shows you all the things you've lost

There's no light in here now
There's no light in here now

If you take the kids and go
I can't blame you for the things you know
And when I'm out there on the road
I think you and those kids at home

There's no light in here now
There's no light in here now

Well 10,000 weight in gold
Never feels like treasure until you lose it all

Well I packed my bag for the road
I grabbed my hat 'cause it's time, yes time is marching on
And if you see me out on the road
My bags are packed 'cause it's time, yes time is marching on

There's no light in here now
There's no light in here now
I was burned out and lost
There's no light in here now
I was burned out and lost
There's no light in here now
And the nighttime was the worst
There's no light in here now
I was burned out and lost
