10,000 Weight In Gold

The Head and the Heart

I was burned out and lost A dusty bulb, an abandoned lot And the nighttime was the worst It shows you all the things you've lost

There's no light in here now There's no light in here now

If you take the kids and go I can't blame you for the things you know And when I'm out there on the road I think you and those kids at home

There's no light in here now There's no light in here now

Well 10,000 weight in gold Never feels like treasure until you lose it all

Well I packed my bag for the road I grabbed my hat 'cause it's time, yes time is marching on And if you see me out on the road My bags are packed 'cause it's time, yes time is marching on

There's no light in here now There's no light in here now I was burned out and lost There's no light in here now I was burned out and lost There's no light in here now And the nighttime was the worst There's no light in here now I was burned out and lost
