

It's Only Natural

The Higher

You know what time it is
3, 2, 1

And I wish you would, oh oh oh
Come over here and
Show me something good,
You got me thinking about, thinking about
How you look, oh hot damn
You must have wrote the book
Oh, that girl is so fine
She must of wrote the book

And every second is electric
Like a thousand volts
Not to mention, my intentions
Only natural, and your affection
Is the question I have
Yet to close and I'm close

You keep giving me looks
When you come my way
The way you're shaking me up it's like an earthquake
You keep giving me looks
That I can't escape
You make my pulse race
With the 808

And you know I could, oh oh oh
Come over there and give you
Something good, I bet your
Thinking about, thinking about
How your hooked, oh on me now
You know I wrote the book
With a touch like mine
I must have wrote the book

Cause every second is electric
Like a thousand volts
Not to mention, my intentions
Only natural, and your affection
Is the question I have
Yet to close and I'm close

You keep giving me looks
When you come my way
The way you're shaking me up it's like an earthquake
You keep giving me looks
That I can't escape
You make my pulse race
With the 808

And every second I'm infected
And without a cure
And I'm positive you're
Someone worth fighting for
You just got that something more
Plus I'm really sure

You keep giving me looks
When you come my way
The way you're shaking me up it's like an earthquake
You keep giving me looks
That I can't escape
You make my pulse race
With the 808

You keep giving me looks
When you come my way
The way you're shaking me up it's like an earthquake
You keep giving me looks
That I can't escape
You make my pulse race
With the 808

Ohhhhhhhh, you must have wrote the book
