

Chasing Shadows

The Horrors

It's so clear with you
and you're like no one else
Disappear with you
and you're like no one else
Oh, now look around
see the sun in you
Oh now look around
everyone and you

You know the morning will come
but for now I'm with you
Morning will come
but for now I'm with you

Now I have to know
as eyes caress the night
Will you turn to go
or follow in the light
Oh now look around
see the sun in you
Oh now look around
everyone and you

You know the morning will come
but for now I'm with you
Morning will come
but for now I'm with you

How do you feel
when the sun hits your eyes
How do you feel
when you see it for yourself

You know the morning will come
but for now I'm with you
Morning will come
but for now I'm with you
Morning will come
but for now I'm with you
Morning will come
but for now I'm with you
