Circus of Death

The Human League

Why in just a few moments we're off to Hawaii to join Steve McG arrett and the team for tonight's adventure

Nine o'clock flight from Hawaii The Trident is just touching down We're waiting here on the tarmac McGarrett is wearing a frown He's here to help with a problem A blood-spattered curse on our land Please cast your eye over this map, sir This business is quite out of hand

The circus of death is approaching It's pathway is painted in red Before it the frightened and helpless Behind it a trail of the dead

The narcotic that forges their union Is a substance known only to one To the clown it is known as dominion It's a secret that he'll give to none

The drug which gives the clown power Means the circus can never be stopped And his dream can go on unhindered Till the last human being has dropped

Spare me and my family, I've done you no wrong Go away, please let us be, I've known you for too long
