

# Let's Get Together Again

The Human League

Let's get together again. All you need is here to stay. Let's get together again. Forget about your yesterdays.

It's been a very long long time. Since I last remember seeing you. I hope you write and say you're fine. Did you ever sit and dream. Of the time when we would meet again? It's very hard now you're not mine.

The 'phone's right next to you. And you know just what to do. Just pick it up. And call my name.

Let's get together again. All you need is here to stay. Let's get together again. Forget about your yesterday.

Tomorrow's just a step away. 'Til I come running back to you. I hope you stay right by my side. I thought I'd never see. My angel back here next to me. Promise me that you won't hide.

The 'phone's right next to you. And you know just what to do. Just pick it up. And call my name.

Let's get together again. All you need is here to stay. Let's get together again. Forget about your yesterday.

And you know there ain't much time. I'm so alone. Please come home. I'm on my own.

Let's get together again. All you need is here to stay. Let's get together again. Forget about your yesterday.

Let's get together again. All you need is here to stay. Let's get together again. Forget about your yesterday.

Let's get together again. All you need is here to stay. Let's get together again. Forget about your yesterday.
