Love Action

The Human League

When you're in love You know you're in love No matter what you try to do You might as well resign yourself To what you're going through If you're a hard man or if you're a child It still might get to you Don't kid yourself you've seen it all before A million mouths have said that too

I've had my hard times (hard times) in the past I've been a husband and a lover too I've lain alone and cried at night Over what love made me do And the loved ones who let me down And couldn't share my point of view But this is Phil talking I want to tell you What I've found to be true

I love your love action Lust's just a distraction No talking, just looking Watching your love action

I believe, I believe what the old man said Though I know that there's no lord above I believe in me, I believe in you And you know I believe in love I believe in truth though I lie a lot I feel the pain from the push and shove No matter what you put me through I'll still believe in love And I say

I love your love action Lust's just a distraction No talking, just looking Watching your love action (3x)
