The Path of Least Resistance

The Human League

Faced with the choice What would you say? The path of least resistance It seems the only way But can we look a little further? Too little far I think Self-belief's the answer And not another drink The safe method, the only way You rationalise your course Stay part of the crowd And never find the source Feel wanted, feel numb Just stay as you are The truth is - comfort kills And you don't need that car So sad, the early grave

When all the fun's for free digging the early grave And keep it warm for me Faced with the choice What would you say? The path of least resistance It seems the only way But let's look a little further Too little far, I think Self-belief's the answer And not another drink The safe method, the only way You rationalise your course Stay a part of the crowd And never find the source Feel wanted, feel numb Just stay as you are The truth is, comfort kills And you don't need that car
