

## Take It Or Leave It

### The Icarus Account

I can take it or leave it she said  
Let's just make or break this thing right here and right now  
Cause you've already broken my heart  
And I've already made up my mind  
Love is a treasure that we both have yet to find

Oh my love somehow we've given up we've given up already  
Oh this love we found has disappeared it's disappeared already  
How can we get back to where the love we had was all we'd ever  
need  
You're all I need  
So please don't leave

There's a place we used to stay  
At the beach in the early days  
We would laugh and talk of growing old  
As the waves trickled up to our toes  
But you're already tired of talk  
And I already forgot how to laugh  
Love is an ocean and we're both on separate coasts

I can take it or leave it she said  
Her bags were packed and by the door  
And tears were falling on the floor  
Please would you unpack your things  
I said as I fell to my knees  
Love is an arrow and its piercing you and piercing me and pierc  
ing us all

This is me this is me with my heart on my sleeve  
Saying please darling please darling please just don't leave  
You know yes you know that I need this  
So let's carefully pick up the pieces

I can take it or leave it right here and right now
