

Communist Moon

The (International) Noise Conspiracy

Hey brother won't you please open up your heart for me
And sister the best dreams to dream are still for free
No more dead time with you on my mind with you by my side
Our hungry hearts and this old world's about to collide

Let it begin tonight we'll win

Let's all share our dreams under a communist moon

Hey sister I'm counting the minutes until you're here with me
And brother if you want to join in please feel free
It comes everywhere it comes all at once below and above
From desperate times comes radical minds living armed love

Let's all share our dreams under a communist moon

We find hope in our hands
It'll see us through the night
All of our dreams and all our plans
Will come alive tonight

Let it begin tonight we'll win

Let's all share our dreams under a communist moon

The moon up above will show you the love
To see us through the night

Let's all share our dreams under a communist moon
