

(I've Got) Survival Sickness

The (International) Noise Conspiracy

Manifest this repression with smart bombs and easy listening
Rally me up in this non-
decision making, I've got my mind in for the taking
My heart still hurts from last night
Do you feel alright?

I've got survival sickness

Entertain me, the plot thickens, serve me up some of your good
living
A grand total of understatement, show me salvation and I'll hate it
My heart still hurts from last night
Do you feel alright?

I've got survival sickness

Do you know how it feels not to be wanted down here?
Do you know how it feels not to feel at home anywhere?
Do you know how it feels to live life down on your knees?
Do you know how it feels to always say please?

My heart still hurts from last night
Do you feel alright?

I've got survival sickness
