

Like A Landslide

The (International) Noise Conspiracy

We've been waiting for a real solution
We're talking about arms this time
No more orders no more directions
No more waiting around in line
Don't you ever feel like picking up something
Not just pieces of love
Been looking all over for salvation
Now we've had enough

We all together just like a landslide this time

No more dreams about this powerstructure
Now we're on the move
Another rock in the machine
Tired of being screwed
Don't you ever feel like being a part of something new
And we've been told so many times
That there is nothing that we can do

We all together just like a landslide this time

We're gonna move like a movement
Cause that's what we're gonna be

We all together just like a landslide this time
