

Liza Radley

The Jam

Liza Radley, see the girl with long hair
See her creeping 'cross summer lawns at midnight
And all the people in the town where we live say
She's not quite right
She don't fit in with a small town
They just can't understand why she's doesn't stay in hospital
In a darkened room it's for their lives only she cries
Liza Radley, see her jump through loneliness
Liza Radley, take me when you go

And as the people pass by, their heads in the air
On to with their life's, she records a lonely sigh
But no matter what they say, in her mind she knows
Their dream of life they won't never find

And all the people in the town where we live say
She's not quite right
She don't fit in with a small town
They just can't understand she's doesn't stay in hospital
In a darkened room it's for their lives only she cries
Liza Radley, I pledge myself to you alone
But she kissed my face and said
Love means nothing at all
She kissed my face and said
Life means nothing at all
