

## All You Need

### The Jezabels

I'll pick you up when you're feeling down  
Drag your ass out on the town  
Baby, I'll be all you need  
I'll pull you out of your sunken dream  
Hold you like a true friend  
Because babe, that's what you do for me

It seems like our blue sky is dawning  
Every single morning  
Baby, we don't need no jewels  
And you know what?  
If I try and you can get the vibe then  
'Cause babe, that's what I do for you

When skies are grey  
You had a different point of view  
I had no faith  
Until I stuck a coin in you

You live your life like a star  
Baby, you know who you are  
Babe, you don't need no reproof  
I know it's hard to believe  
Almost impossible to believe  
Oh but baby, I'll be all you need

When skies were grey  
You had a different point of view  
I had no faith  
Until I stuck a coin in you

My legs were late  
I know my secret's safe with you  
My legs were late

And if I stray from the light  
It'll be only for a little while  
Only for a little while  
And if I stray out of line  
Only for a little while (2x)  
And if I fade out of reach  
Only for a couple beats (3x)

Don't fly (2x)
