## **On Top**

**The Killers** 

Remember Rio and get down Like some other DJ, in some other town Has been trying to tell me to hold tight But I've been waiting this whole night But I've been down across the road or two But now I've found the velvet sun That shines on me and youD

In the back, uh huh, I can't crack
We're on top
It's just a shimmy and a shake, uh huh
I can't fake, we're on top
We're on top

The day is breaking, we're still here Your body's shaking, and it's clear You really need it, so let go And let me beat it, but you know That I've been down across the road or two But now I've found the velvet sun That shines on me and youD

In the back, uh huh, I can't crack
We're on top
It's just a shimmy and a shake, uh huh
I can't fake, we're on top
We're on top
We bring the bump to the grind, uh huh
I don't mind, we're on top
It's just a shimmy and a shake, uh huh
I can't fake, we're on top
We're on top

And we don't mean to satisfy tonight So get your eyes off my bride tonight Cause I don't need to satisfy tonight

It's like a cigarette in the mouth Or a handshake in the doorway I look at you and smile because I'm fine

And we don't mean to satisfy tonight So get your eyes off my bride tonight Cause I don't need to satisfy tonight

It's like a cigarette in the mouth Or a handshake in the doorway I look at you and smile because I'm fine
