

## The Way Love Used to Be

The Kinks

I know a place not far from here  
It's not far away, love, but if you come  
I know a place where we'll be alone  
And we'll talk of life, the way love used to be

I know a place not far away  
And we'll find a way through the city streets  
We'll find a way through the mad rushing crowd  
And we'll talk about the way love used to be

I know a place not far from here  
It's not far away, love, but if you come  
I know a place where we'll be alone  
And we'll talk about the way love used to be
