## I Need You Now

**The Kinleys** 

I heard our song from a passing car The music faded down the boulevard Streets of empty silence cried out loud Telling me that I need you now

Lonely whistle of a passing train That calls to me in the pouring rain A face I never see in every crowd Reminds me that I need you now

I'll never get over you 'Cause everything I do Leads me back to you somehow Like a fool I believed That you would never leave I let you walk away I was just too proud To tell you then That I need you now

I used to wonder where we went wrong Now I wonder how you stayed so long In a love where honesty was not allowed And I never said I need you now

I'll never get over you 'Cause everything I do Leads me back to you somehow Like a fool I believed That you would never leave I let you walk away I was just too proud To tell you then That I need you now

All I know is I need you now
