

Trouble

The Knocks

The trouble with you
The trouble with you
You don't do what your heart wants to
You never listen to it, no, no
You never listen to it, no, no
That's the trouble
That's the trouble with you
The trouble with you
That's the trouble with you
The trouble with you
That's the trouble with you

The doctors say the blood is pumpin' through you just fine
Pulse and tempo on the neon light
They can't tell you why you don't feel right
They don't know why you can't sleep at night

The trouble with you
You don't do what your heart wants to
You never listen to it, no, no
That's the trouble with you
The trouble with you
You don't do what your heart wants to
You never listen to it, no, no
You never listen to it, no, no
That's the trouble
That's the trouble with you
The trouble with you
That's the trouble with you
The trouble with you

So-called friends with the bad advice
Smile through the day, tryin' to seem nice
They don't care if you feel like this
And they don't know what the trouble is

The trouble with you
You don't do what your heart wants to
You never listen to it, no, no
That's the trouble with you
The trouble with you
You don't do what your heart wants to
You never listen to it, no, no
You never listen to it, no, no
That's the trouble
That's the trouble with you
Listen to it, no, no
The trouble with
Never listen to it, no, no
