

## Something's Missing

The Lemonheads

It's no trick to decide on your own  
You feel it when you feel fine later on  
A shower you can't depend on at all  
It's too hot then it's too cold then it's warm  
Something's missing something's missing  
Something's missing something's missing  
From my life  
The things I don't multiply and divide when  
I just can't decide been here before  
It's gonna come back again been here before  
It's gonna come back my friend  
Something's missing something's missing  
Something's missing something's missing  
From my life  
I ain't quiet deep inside I ain't even on my side  
Something's missing from my life  
There's nowhere I really wanted to stay and  
Nothing really makes it ok  
Nothing really makes it ok  
There's nowhere I really wanted to stay  
Something's missing something's missing  
Something's missing
