

# Fear

## The Letter Black

Do you know what the most frightening thing in the world is? It's fear  
Next time when you are frightened of the dark don't scream  
She just goes a little mad sometimes  
We all get a little mad sometimes

This I must confess  
I haven't put to rest  
But I need to face it  
No turning back this time  
Worst things I could rewind  
But I need to kill it

One more day  
I can't wait  
It's tearing me apart  
This I must confess  
I haven't put to rest  
But I need to face it

You want it  
You need it  
My fear you won't get in anymore  
[x2]

You underestimate  
You thought I was too late  
And now I have you crying  
You said I was too weak  
I let you get to me  
The longer will I listen

One more day  
I can't wait  
It's tearing me apart  
This I must confess  
I haven't put to rest  
But I need to face it

You want it  
You need it  
My fear you won't get in anymore  
[x2]

The next time you are frightened in the dark, don't scream

I have no fear!  
I have no fear!

You want it  
You need it  
My fear you won't get in anymore  
[x4]

I have no fear!
