

Pretty Target

The Levellers

Since you came along, high above the scene
You've taken all the worry out of me
Yeah, you brought a change that chemicals can't find
I'm no longer thinking that I'm living in a medium time

And I won't let you down, no I won't let you down
You're such a pretty target for this world to kick around
And I won't let you down, no I won't let you down
Not since you dragged me from my hole in the ground

I smoked the world, drunk dry the sea
Was devoted to my mirror which I could never see
Then you came along, oh so prettily
And in the twist of a year, I was living in a dream

And I won't let you down, no I won't let you down
You're such a pretty target for this world to kick around
And I won't let you down, no I won't let you down
Not since you dragged me from my hole in the ground

And I won't let you down, no I won't let you down
You're such a pretty target for this world to kick around
And I won't let you down, no I won't let you down
Not since you dragged me from my hole in the ground

And I won't let you down, no I won't let you down
You're such a pretty target for this world to kick around
And I won't let you down, no I won't let you down
Not since you dragged me from my hole in the ground
