

# Shadow on the Sun

The Levellers

We've been singing since the morning 'til the setting of the sun  
We sing of everything forever 'cause we've been going for so long.  
We sing the heart of the cold song Ever since we started the only one.

It's got words that bring us heaven It's got words that give us hell  
It's got tunes that shine like diamonds And vicious notes as well  
It's the feel of warm rain The song of forever the unbroken chain

CHORUS There's a shadow on the sun That used to shine so brightly  
For some it all goes wrong Who refuse to step lightly There's a break in the clouds  
Let the cold sun on me Like the new born doubt That nothing's ever gonna be free.

It tells the sentiment of growing And a tale of lonely death It says everything worth knowing  
'Til you draw another breath. Hear the clouds ring on The song of forever the only one,

CHORUS

And it gets me like nothing gets me Then it throws me right back down.  
It holds me then it chokes me As it lays me on the ground.

Some will write a new line then some will pass in on Some just sing the same verse  
But most will get it wrong Play the heart of a cold song Ever since we started the only one.

CHORUS

OUTRO: That's the heart of a cold song We sing the heart of the cold song  
That's the heart of all songs That's the heart of a cold song.
