## The Riverflow

## The Levellers

I met you in 82, over a crate of beer and not a few
I cracked a can and so did you, we're going to change the world
The ghetto kings of downside town
The estates and parks of our hallowed ground
Doing anything that we found, and on the river flowed

You'd take a drink from Rev. Jimmy Jones
You'd cross the street on the path the gunman roams
Thrown aside and left to waste, that was you, you knew your pla

Wander round, get off your face, and on the river flowed

On and on the river flow, we are the undertow On and on the river flow, we are the undertow

I don't know how you made it through all the smoke and brew you do

It sure has left its mark on you but you're still with us today Life goes on and 'round we go and words can kill these things I know

Sometimes you cut deeply so, but on the river flows

You'd set the table for barber Sweeney Todd You'd clip the wings of any rising God But man can't live on hope alone, it can be cut all that is grown

Broke your spirit but not your bones and on the river flows

## [Unverified]

You're working now, forced to the race I know it left a bitter taste
But the rising tide had covered your face
Nothing you could do

But I still remember the day you said That the river flowing through my head Would take me far or leave me dead And all you said was true
