

# Wheels

## The Levellers

He came off second best when he first came round here  
In a town that's built on money, built on fear  
Just don't fake life  
He's been told a thousand times

You see the wheels that we turn in keep dragging us down

He was amazed to see the fallen here  
Tried so very hard to fight the fear  
Then when he saw the end and it weren't very far  
It slipped from his grasp and he stumbled there in the dark  
Just don't fake life  
He's been told a thousand times

You see the wheels that we turn in keep dragging us down

He took a troubled heart and then he gave it out  
Took a violent change of circumstance to shout  
There can be nobody better to turn things around  
Yes there can be nobody better to turn things around  
Just don't fake life  
He's been told a thousand times

You see the wheels that we turn in keep dragging us down
