

This Power

The Lightning Seeds

Here it comes, here it comes now,
Here it comes again, here it comes now

I don't know the future
But I can live with the past
Here it comes again, did it find you at last?

The future's fine, clear your mind
Close those eyes, you're hypnotized
So take your time, relax, clear your mind,
You'll be fine
This power it's ours
This power it's ours
This power it's ours
This power it's ours

Here it comes, here it comes now
Here it comes again, here it comes now
Glance over my shoulder
You're nowhere near so what went wrong?
