

Little Space

The Limousines

I would take that little heart
To a safer place
I don't think you have a clue
What you've gotten yourself into

Wish it could be some other way
But the past is true
The devil's in that little space
Between yellow and blue
Between yellow and blue

You could keep your legs apart
'Til you find some faith
I don't think I have a clue
What I've gotten myself into

Wish you could take another taste
But the path goes through
The devil's in that little space
Between your love and you
You know know know
You know know know

It's in that little space
You know know know
It's in that little space
Between yellow and blue
It's in that little space
You know know know
It's in that little space
Between your love and you

The devil's in that little space
