

The Last Dance

The Limousines

We could see forever from here
City lights and setting sun
We could see it through the ceiling
The sky is falling down
We could see the angels swirling
Vultures in circles now
We could see the road with no end
When all is said and done

And even when my palms get sweaty
I'm not gonna let you down
Ripping up a wedding dress
And burning down our tiny house
We could be the rolling thunder
We could be the last dance

I might be wrong
But I've been right for so long

We've got it
What everyone else is just jealous of
Please darling
You know I'm out of my mind with you
We've got it
What everyone else is just dreaming of
Please
Darling
You know I'm out of my mind

We could watch the days disappear
Seven moons are seen as one
We could take a vow believing
Temptation's not around
We could watch the vultures swirling
Angels in circles now
We could watch the lonely forage
Through garbage on the ground

And even when I'm down I'm betting
Our luck's gonna turn around
Ripping up our Sunday best
And burning down entire towns
We could build a road southern
We could be the last dance

My sight is gone
But I can hear the choir coming

We've got it
What everyone else is just jealous of
Please darling
You know I'm out of my mind with you
We've got it
What everyone else is just dreaming of
Please
Darling
You know I'm out of my mind

Keep our balance
Keep our balance
We keep our balance
