

Stranger To You

The Little Flames

After all this time
She's a stranger to you
And the distance strains
And the world between your moves
Finding desperate words
As the sugar kisses fade
From different at you fall apart
From different at you fall apart

Do you doubt it?
Do you love that
she's a stranger to you?
Do you need it?
Do you know
that she's a stranger to you?

No time to turn
No words in the sun
Your future flies
From her empty hands
Love won't make it all okay
Love won't make it all okay

Do you doubt it?
Do you love that
she's a stranger to you?
Do you need it?
Do you know
that she's a stranger to you?

All the feelings gone
All the loving is gone
Trying to hold on

Never seems enough
Think about at all
Still it seems like love

Just before I saw
Distance in her eyes
After all this time
