

Nocturne

The Love Language

Wildflower, 'neath the Autumn leaves
lead me to the river, bind my hands and feet
lost for words...
I just couldn't speak

Will I sink or swim up to the gods to pull me in?
Like a fish in the sea
come to me
bad retention is
killing our sheep

Light through sleeping eyes
blend the colors with the night
song constructed from the fire
sing it all the way to the sky

Wild, wildflower, still breathing in the sand
spread your leaves just like feathers, as the rain sets in
ah, it's so dry
couldn't understand

Will I sink or swim up to the gods to pull me in?
Like a fish in the sea
come to me
bad retention is
killing our sheep

Light through sleeping eyes
blend the colors with the night
song constructed from the fire
sing it all the way to the sky

Ten thousand years and you're still not ready for changes
you've got your fathers eyes
but who will have them after you die?
