Living Will (get You Dead)

The Loved Ones

all alone again he woke up screaming here he needs more oxygen to breathe help him up hold him down like a freight train it's bearing down again he's got holy water in his lungs help him up

if that's how it's gonna be wake me up wake me up pump me full of meds don't let me drink from that cup slide a little pill down my throat i'll try to keep it down or pull my plug and don't be frightened by the sound

seventy and ten
outlived the best of men
he wants to see his little kids again
help him up
but in all his years
the pain's never been this severe
now he's spiraling in fear
hold him down

if that's how it's gonna be wake me up wake me up pump me full of meds don't let me drink from that cup slide a little pill down my throat i'll try to keep it down or pull my plug and don't be frightened by the sound
