A Fall From Grace

The Madison

When I sat Felt I had no where else to go When in before the sun and god only knows When I see your face it makes me think of that special place Stood out on the rocks and watched the stars all fall from grac e

But I knew that it had to end some day You just didn't know what words to say

Constant fights getting stuck in my mind I thought we knew enough to go and put them all behind If I had the chance to make it all mend I'd hold in you in my arms and never let you go again

Never let you go, never thought I'd know Never let you go, never thought I'd know

But I knew that it had to end some day You just didn't know what words to say

Felt we needed to spend some time You didn't want to I knew because I read your mind When I think back to that day you went away I wanted to follow you, you knew I didn't want to stay
