

## The Only Boy in Town

### The Magnetic Fields

Oh if only you were the only boy in town  
For then I could not play the field and let you down  
I would not go half-mad for each passing lad  
With eyes of blue, green, gray, or brown  
No, if only you were the only boy in town

Oh if only you were the only boy in France  
Our life would not be like one long, long, long seance  
I think I would endeavor to love you forever  
Instead of only for the nonce  
If-if only you were the only boy in France

With the only boy in town  
With the only available male  
In the loneliest possible world  
There would be no daily betrayal

Oh if only you were the only boy alive  
And I were the queen of our small, small, small beehive  
Though more pricks than a cactus may always distract us  
Would they all take up all my sex drive?  
Not-not-not if you were the only boy alive

Oh if only you were the only boy in town  
Oh if only you were the only boy in France
