Don't Come Down

The Maine

Here's to now
And nothing else
In the crowd
All by yourself

To the lows and every high
The hellos and the goodbyes
In this moment, I could die
With you
Never felt like this feel before
Dizzy, drunk, and beautiful
In this moment, I let go
With you

When you are next to me and the music's loud Singing 'Hey Nineteen' somewhere in the crowd We are up so high They can't touch us now We are thousands of feet from the ground And won't come down We won't come down

Yeah, here's to all To all this culture's rules and your pretty things How dirty, wild, blurry, juvenile We ain't got no time for what tomorrow brings

And the choir sings
To all the lows and every high
The hellos and the goodbyes
In this moment, I could die
With you

When you are next to me and the music is loud Singing 'Hey Nineteen' somewhere in the crowd We are up so high They can't touch us now We are thousands of feet from the ground And won't come down We won't come down

Here's to now
And to nothin' else
In the crowd
All by yourself
To the lows and every high
The hellos and the goodbyes
In this moment, I could die
With you
Yeah, right here with you!

And when you are next to me and the music is loud Singing 'Hey Nineteen' somewhere in the crowd Yeah, we're up so high They can't touch us now We are thousands of feet from the ground Yeah, we're never going down

To the lows and every high
The hellos and the goodbyes
In this moment, I could die
With you
And we're never going down
Never felt like this feel before
Dizzy, drunk, and beautiful
In this moment, I let go
With you
