

## Amsterdam Moon

The Mavericks

Ever since the world began  
She's been there to lend a hand  
From Galileo to Van Gogh  
She'd shine her light to let us know  
To stand before her once again  
For she's a wise and kind old friend  
She's always there to see us through  
Amsterdam moon

If you look close, you'll see her scars  
They're brought to her by jealous stars  
A guardian angel she has been  
An inspiration all have seen  
I'll stay with her throughout the night  
Makin' sure she'll be alright  
Tonight's my turn to see her through  
Amsterdam moon

I stand before her once again  
For she's a wise and kind old friend  
She's always there to see us through  
Amsterdam moon

She's always there to see us through  
Amsterdam moon
