

Amsterdam Moon

The Mavericks

Ever since the world began
She's been there to lend a hand
From Galileo to Van Gogh
She'd shine her light to let us know
To stand before her once again
For she's a wise and kind old friend
She's always there to see us through
Amsterdam moon

If you look close, you'll see her scars
They're brought to her by jealous stars
A guardian angel she has been
An inspiration all have seen
I'll stay with her throughout the night
Makin' sure she'll be alright
Tonight's my turn to see her through
Amsterdam moon

I stand before her once again
For she's a wise and kind old friend
She's always there to see us through
Amsterdam moon

She's always there to see us through
Amsterdam moon
