

Backslide

The Mayfield Four

Nothing's good enough
You gave the moon and the stars above
To the queen of pain, now you've gotta know
She'll take you down just like before
So don't go back there again
Your head may want it but your soul will break

You can't get enough
(Don't go back you'll be better off)
You can't get enough
(Don't go back you don't need her love)
Don't you backslide stay away

It kills you all the time
Her disease may take a while to heal
And find some relief, there's no remedy
To push away that entity
That tempts you when you're weak
Stay strong don't give in hold steady don't shake

You can't get enough
(Don't go back you'll be better off)
You can't get enough
(Don't go back you don't need her love)
Don't you backslide stay away
Just stay away
