

Farewell, goodbye, God knows we tried
Our union so unsure could never endure

So we turn the page and say goodbye and walk away from
everything
That we worked so hard to save

Brought down by our storm
Our eden is no more

But we were so lost in love
That we never found resolve

So we turn the page and say goodbye and walk away from
everything
That we worked so hard to save

I don't want to start all over and find another shoulder
to lean on
'Cause yours makes me feel safe

And now you're holding on
You're such a blessing and please stay strong
For what it's worth, I'm wishing you the best

So we turn the page and say goodbye and walk away from
everything
That we worked so hard to save

I don't want to start all over and find another
shoulder to lean on
'Cause yours makes me feel safe

Yours makes me feel safe
'Cause yours makes me feel safe
I'm wishing you the best
