

Lucky Devil

The Mekons

Lucky devil, lucky star
Shine so bright, see so far
Out across the ocean black and blue
Into the fire that's burning for you

I built my house upon a rock
I always knew just when to stop
But then a pair of dice fell in my hand
And I found out they were too hot

How I wonder where you are
See I've left the door ajar
You know something that I don't
And you'll do something that I won't

Lucky devil, lucky star
Shine so bright, see so far
I can see some sailors drowning in the sea
Picture rock of ages cleft for me

Don't be scared just take my hand
There's a little tear duct in the sand

Lucky devil, lucky star
Shine so bright, see so far
I can see the lucky number on your skin
And I can feel the needle where the luck goes in

Oh, how I wonder where you are
See I've left the door ajar
You won't ever come to harm
My name is written on your arm
