

The Flame That Killed John Wayne

The Mekons

A medieval city of glass and steel
A church and a liquor store, and auto repair shop
Bees keep buzzing like gas on wheels
A church and a record store, an auto repair shop
The hand of death is reaching out
Stealing kisses under the street
It's the flame, the flame that killed John Wayne

I can't wait to see you undressed
I feel like your undertaker
Look yonder Mayor Richard Daley
He wants to see this whole town naked
Zen Buddhist hot dog man
Make me one with everything
The monster, the monster is out of his box

Best song since 68
A prairie fire beside the lake
It's the flame that killed John Wayne
