

I Got It (Do You Want It)

The Meteors

You call me friend but sometimes I must wonder
If you remember who or what I fucking am
From start to end I gave you all but you've forgotten
You only tell me what you think you'd do for me

You want it I got it best not take it unless you mean it
It can do wonders or break up your fucking life

Its true to say you ain't the first to sting me
It's on the way I always feel it in the wind
Well one fine day you'll make the move but you'll regret it
You'll loose it all and tell yourself the blames on me

You want it I got it best not take it unless you mean it
It can do wonders or break up your fucking life

I wont stay up to long crying when your gone
If you turn away and run its your choice from now on

You want it I got it best not take it unless you mean it
It can do wonders or break up your fucking life

I wont stay up to long crying when your gone
If you turn and run away its your choice from now on

-

Don't know why I bother its just a gift or curse I got
I gotta let you take something from inside me

You want it I got it best not take it unless you mean it
It can do wonders or break up your Fucking life

You want it I got it best not take it unless you mean it
It can do wonders or break up your Fucking life

You want it I got it best not take it unless you mean it
It can do wonders or break up your Fucking life
