I Want My City Back

The Mighty Mighty Bosstones

Up around 95, sailing down Storrow Drive Left exit into Kenmore Square Slowed down when I got there And that's when it was crystal clear It wasn't there, it wasn't where I left it, when I left it I want my city back Back the way it used to be I want it back the way it was I looked around and found This doesn't feel like my hometown And I don't like the way it does Stepped out to take a closer look Held in with every step I took The sadness I felt just to look around I looked up to the Citgo Sign You used to be a friend of mine Do you agree with me at one time This was once such sacred ground I want my city back Back the way it used to be I want it back the way it was I looked around and found This doesn't feel like my hometown And I don't like the way it does feel, feel How should I feel when the place Where I first learned I could feel Is no longer where I left it When I left it not so long ago How should I feel? (3x)Well I don't know (I want my city back Back the way it used to be I want it back the way it was I looked around and found This doesn't feel like my hometown And I don't like the way it does feel (2x))
