

Dragonfly

The Mission

When you're scared and fell all alone
Reach out for me
In the cold and dark of night
Reach out for me
I will always be there for you
No matter what you say or you do
I will always shine hard for you
And light your way

When the world is dragging you down
Reach out for me
And when the hurting goes too deep to tear
Reach out for me
No matter how far away
Whether it's night or day
Remember I'm under the same big sky as you

The warmth from the sun will liberate and beautify
So spread your wings and soar in to the sky
As the dragonfly

When you feeling shackled and chained
Reach out for me
When you're tethered by doubt and fear
Reach out for me
There's nothing I wouldn't do
I'd lay down my life for you
I want to believe in the spell in the spell you weave

And love will always heal and purify
So open up your wings and soar as the dragonfly
With every dawn
There comes a sunrise after every storm
There comes a blue sky with every kiss
There comes a promise

The warmth from the sun will liberate and beautify
So spread your wings and soar as the dragonfly
And love will always heal and purify
So open up your wings and soar into the sky
As the dragonfly
