# All The Answers

**The Moffatts**

You know, you know all the answers
To my questions, I have asked
I have touched you
You're all around me
You frustrate me
Just delete me

chorus
Some people are afraid of you
But I'm not (I'm not)
I'm a dummy and I just don't care
Only you know (through my window)
All the answers (answers)
All the answers (answers)

I'll explore you
I'll unfold you
I'll download you
then I'll store you
When you're perfected
Then you'll kill us
With your virus
You're a tyrant

repeat chorus

Now you're faster
But I don't like you
You're a problem
I must do it

It's so complex
But so simple, simple
You made me crippled
I'm addicted

repeat chorus

You were meant to make the bad times go away
But as it looks they're here to stay
Take me back before the automated life took us over, over

repeat chorus
