

Love

The Moffatts

The first time I saw you
You were walking down the beach at night
With the waves bowing down to you In the bright moonlight
Well it must have been a signal from up above
'cause deep in my heart I knew that it was love

And it turns me on
Like when the sun goes down
And the moon comes up
Sweet, sweet love, like no other man has been touched
By the simple process of love I wish there were a way
To show you my love is real
But Webster hasn't found the words
To express how I feel
Well just like a river needs the rain to flow
You've warmed a heart that once was cold, with your love
