

## Song for John Davis

The Mountain Goats

the day we set sail from england  
the wind behind us was fair  
the day we set sail from england  
there were smiling faces everywhere  
and the snow came down on new hampshire today  
and the snow came down on new hampshire today

the day we put the grain into the ground  
there were smiling faces all around  
and underneath the trees we planted when we landed

when i was a child  
i spoke with the language of a child  
but when i became a man, i put away childish things  
and the snow came down on new hampshire today  
and the snow came down on new hampshire today
