The Music

Have you ever looked
Across the midnight sky
The stars roll down
The ocean floods
To where the red sky first began
Have you ever

And everybody better get up and listen
Coz we got something to say to you
And everybody better get up and listen
Coz we got something to say to you
And everybody better get up and listen
Coz we got something to say to you

Can't dream what you gonna do now
Can't dream what you gonna do now baby
Can't dream what you gonna do now
Can't dream what you gonna do now

Everybody better get up and listen
Coz we got something to say to you
See all the people think that
They'll be forgiven
And all the reasons that is true

Are you gonna be there
Are you gonna be there
Are you gonna be there
Are you gonna be there

Are you gonna be there, what you gonna do now
Gonna be there, what you gonna do
Are you gonna be there, what you gonna do now

Can't dream what you gonna do now
Can't dream what you gonna do now baby
Can't dream what you gonna do now
Can't dream whaaaaaaaaaaaaaaaaa

Everybody better get up and listen
Coz we got something to say to you
and everybody better get up and listen
Coz we got something to say to you
Yeah we got something to say to you

Are you gonna be there
Are you gonna be there
Are you gonna be there
Are you gonna be there

Are you gonna be there, what you gonna do now
Gonna be there, what you gonna do
Are you gonna be there, what you gonna do now
Gonna be there, what you gonna do
Are you gonna be there, what you gonna do now
Gonna be there, what you gonna do now
Gonna be there, what you gonna do now

Gonna be there, what you gonna do now
Gonna be there, what you gonna do now
Gonna be there, what you gonna do now
Gonna be there, what you gonna do now
Gonna be there, what you gonna do now
Wah wah.....

Can't dream what you're gonna do now
Can't dream what you're gonna do now baby
Can't dream what you're gonna do now
Can't dream what you're gonna do now
